

transmitting the information to at least one of a subscriber display means and a subscriber recording means for displaying and recording the information respectively, and

charging the subscriber one of a plurality of amounts depending upon whether the transmitted information is intended for [the information responsive to the subscriber] recording [the information] on said recording means.

14. (Amended) An apparatus for providing information on demand comprising:

receiving means for receiving a request from a subscriber for information,

sending means for sending the information to at least one of a subscriber display means and a subscriber recording means for displaying and recording the information respectively, and

charging means for charging the subscriber [an] one of a plurality of amounts depending upon whether [amount responsive to recording] the transmitted information is intended for recording on said recording means.

Please add the following claims:

16. (Newly Added) A method for providing information on demand of claim 13 wherein said request for information indicates whether the subscriber is recording said information on said recording means.

17. (Newly Added) An apparatus for providing information on demand of claim 14 wherein said request for information indicates whether the subscriber is recording said information on said recording means.
